SENT CERTIFIED MAIL RETURN RECEIPT REQUESTED

NOTICE OF NON-CONSENT TO INSTALLATION OF ANY ELECTRONIC OR
WIRELESS METERING DEVICE

Dear Mr/ Mrs.

I hereby prohibit any electronic or wireless metering device (hereafter referred to as a
“smart gas meter”) from being installed in or around our residence at _____

This letter acts as formal notice, and any liability for damage or harm resulting from these
conditions being violated, rests with the recipient of this letter, the meter manufacturers
and any subcontractors involved in meter production, installation, or operation.

Homeowners have the ultimate authority to decide what technology is installed in their
homes – not utilities whose government-protected monopoly prevents residents from
choosing a competing utility provider.

- Smart meters are a fire hazard, and such devices have been responsible for thousands of fires, explosions, and other serious safety problems.
- Smart meters have caused documented health problems (see attached letter) The bursts of RF radiation emitted by their antennas is considered by the World Health Organization to be a Class 2B carcinogen.
- Smart meters especially affect those with electrosensitivity, an internationally-classified disease (code W 90.0 - exposure to radiofrequency radiation)
- Smart meters collect personal data of private activities in the home in violation of Article 8 of the human rights act (Rights to Privacy)
- Smart meters can disrupt and disable medical devices such as pacemakers. (Outside scope of ICNIRP guidelines)

- The ICNIRP guidelines do not protect sensitive groups or long-term exposure

For these reasons (but not necessarily limited to these reasons) we require only analog, electromechanical meters without electronic components be used in connection with this account.

We will happily self-read the analog meter and accurately track the usage billing for energy consumption on our property, making available the meters for reading confirmation with reasonable notice.

Best regards,

Your Name

Follow up with an email and a phone call asking if they received the letter.
